adjust plan as needed

IMPORTANT NOTES

Possible side effects: nausea, vomiting, constipation, diarrhea, abdominal discomfort, or injection-site irritation.

Call us if: severe abdominal pain, persistent vomiting, dehydration, allergic reaction, chest pain, leg swelling, or signs of infection occur.

Directions: administer weekly on the same day; inject SubQ in the abdomen, thigh, or back of arm.

Important: This is a physician-directed supportive protocol and may be prescribed off-label.

Important:

Results vary. These therapies are supportive tools, not guarantees.
Some therapies may be compounded and/or prescribed off-label. This handout
does not replace medical consultation, consent, or individualized instructions.
